

# Presentation of POS System for BIR Classification

## Elevate POS

Request for Confirmation Regarding Internal Sales-Tracking Use

**Important:** This document is a request for evaluation and confirmation by the Bureau of Internal Revenue. It does not claim that the system is exempt from registration or from invoicing requirements.

### 1. Taxpayer / Business Information

|                                 |       |
|---------------------------------|-------|
| Registered Name                 | _____ |
| Trade Name                      | _____ |
| TIN / Branch Code               | _____ |
| Business Address                | _____ |
| RDO                             | _____ |
| Contact Person / Mobile / Email | _____ |

### 2. System Identification

|                           |                                                                   |
|---------------------------|-------------------------------------------------------------------|
| System Name               | Elevate POS                                                       |
| System Type               | Web-based internal sales, order, inventory, and management system |
| Developer / Owner         | _____                                                             |
| Version / Release Date    | _____                                                             |
| System Location / Hosting | _____                                                             |

### 3. Purpose and Scope of Use

Elevate POS is used by the café for internal operational control, including:

- recording orders and sales data for management monitoring;
- inventory and raw-ingredient tracking;

- staff, order, expense, and operational management; and
- internal sales analytics and reports.

The system is not intended to replace the taxpayer's BIR-registered invoice or other document issued to customers.

#### 4. Receipt / Invoice Function

---

- The system does not issue a customer-facing BIR invoice or receipt.
- The receipt-printing feature has been removed or disabled from the deployed version presented to the BIR.
- No system-generated slip is given to customers as proof of sale.
- The café issues its BIR-compliant invoice separately through its approved/manual process.

**Operational undertaking:** The taxpayer will not use Elevate POS to print, issue, or represent any system-generated document as a BIR invoice or receipt unless the system is first evaluated and registered as required by the BIR.

#### 5. Requested BIR Confirmation

---

The taxpayer respectfully requests the concerned Revenue District Office to evaluate the system as configured and confirm in writing:

1. whether the system requires registration or a Permit to Use as a Cash Register Machine / Point-of-Sale machine or other sales machine;
2. whether the system is considered a computerized accounting system, computerized books of accounts, or a component requiring separate registration; and
3. what additional records, reports, configuration controls, or documentary requirements must be maintained.

#### 6. Documents / Demonstration Available

---

- live demonstration of the deployed system;
- screenshots showing the disabled receipt-printing function;
- sample internal sales and inventory reports;
- system architecture and feature overview;
- sample BIR-compliant invoice issued separately by the café; and
- user access, audit-log, and data-retention details, if requested.

#### 7. Declaration

---

I certify that the foregoing description accurately reflects the system configuration and actual use presented for evaluation. I understand that the BIR's classification and any registration

requirement will depend on the system's actual functions and use.
